Pop up stand Case wrap

Cut size-1810mm x 785mm

The bleed area extends 10mm beyond the edge of your finished document. Colours and images must extend beyond the edge of the document to prevent unwanted white borders around the edge of your finished document. Note that this 'bleed' will be trimmed during the finishing process so ensure that no important details are set up to print in this area

it is recommended that your artwork is at least 10mm from the edge of the page if it is not meant to bleed off. Printed borderd placed too close to the edge of a page may look uneven when job is trimmed.

Creating a PDF of your document from InDesign

- 1. From the File menu choose Export. Name your file and select Adobe PDF (print) in the format field. Now click save button. 2. In the Export Adobe PDF General dialog box, select High Quality
- Print as the Adobe PDF Preset.

Panel size-

540mm

- 3. Next, Select Marks and Bleeds dialog box, tick Crop marks and type 10mm into the Bleed area boxes at the bottom, it will auto fill the rest when you type 10mm into the Top box.
- 4. Select Output and change the Profile Inclusion Policy to: Don't include profiles.
- 5. Now Click the Export button at the bottom right of the page.
